## Get Up and Glow With Revercel®'s Warming Pumpkin Enzyme Mask!

**Campbell, CA** — Smart skin care is non-invasive and non-inflammatory, which makes natural enzymes your best weapon of choice against premature aging, sun spots, clogged pores and dull, uneven skin tones. And now, you can achieve a reversal of skin misfortunes with Revercel®'s gentle Warming Pumpkin Enzyme Mask, while supporting an important woman's cause.

Used as an at-home spa treatment, **Revercel®**'s Warming Pumpkin Enzyme Mask gently dissolves dry, outer layers of the skin, drawing out impurities, refining your pores and revitalizing your skin instantly. While pumpkin enzymes, purifying mineral clay and vitamin-packed pumpkin peel go to work, deep cleaning and purifying, you'll actually experience your new glow as it happens! That's because a natural, heat-producing mineral kicks in on application, creating a warm, soothing heat that enhances penetration of the active ingredients. You'll feel warm and wonderfully relaxed but the feel-good factor doesn't stop there. Your spirit will get a boost, too, because in support of October Breast Cancer Awareness Month, a portion of the proceeds from the sale of **Revercel®**'s Warming Pumpkin Enzyme Mask through the end of 2004 will be donated to breast cancer research.

Unlike typical exfoliating products, Revercel®'s Warming Pumpkin Enzyme Mask leaves skin smooth, even-toned and vibrant without dryness. Infused with jojoba oil, beta carotene and encapsulated Vitamin E, it nourishes and moisturizes your skin, while neutralizing the free radicals that contribute to premature aging. With just one use, you're left with a warm feeling and an incredible glow. Why not rejuvenate your skin and your spirit at the same time?

Revercel®'s Warming Pumpkin Enzyme Mask's suggested retail is \$44.00 for a limited time only in a 7oz. tube.

*Developed by Drs. Rick and Arlene Noodleman, the husband and wife physician team specializing in dermatology and preventive medicine, respectively, Revercel® Skin Care takes a dual approach to preventing and treating the signs of aging through an artful combination of proven cosmeceutical ingredients, including peptides, retinols, alpha-hydroxy acids, botanicals and anti-oxidants.*
